

Jet Tech Aviation received the FAA 145 Repair Station Certification

San Juan, Puerto Rico 29 February 2012 - Jet Tech Aviation, a global provider of Line Maintenance has become the **FIRST** and **ONLY** FAA 145 Certified Repair Station with Line Maintenance Authorization in Puerto Rico and the Caribbean.

In order to provide Air Carriers and Corporate Operators with the highest standards of services and diversify the aircraft maintenance services, Jet Tech Aviation has received the FAA 145 Repair Station Certification with proud and joy after a strong certification process.

Mr. Luis Melendez, President/Chief Executive Officer of Jet Tech Inc., said:

Today is a day of joy; we have made history. We worked hard since day one of the certification process.

First, I want to thank God for always fill me with strength and my appreciations to all that were involved in this process to become an FAA 145 Certified Repair Station with Line Maintenance Authorization. Now that we have passed the certification process, we all can celebrate and work hard to exceed company expectations in short terms. We are all parts of this great achievement, because we are the first to complete the certification process during the 57 years of Luis Muñoz Marin International airport operation. Thanks to all our Technical staff, for maintaining the company as the Elite in aircraft maintenance and always be able to go the extra mile.

Many have tried but only Jet Tech Aviation has achieved this certification.

“While the journey has just begun, I am confident that our greatest successes lay ahead.”

Jet Tech Aviation received the FAA 145 certification in the San Juan FSDO-63 on February 29, 2012 by the assigned FAA PMI, PMA and the Front Line Manager.
