

United Airlines B-737 included on Jet Tech Aviation Operation Specifications D107

San Juan, Puerto Rico 16 May, 2012 –Jet Tech Aviation, the Elite provider of Line Maintenance to Air Carriers and Corporate operators in Puerto Rico has amended the Operation Specifications D107 to include United Airlines B-737 fleet.

Jet Tech Aviation Line Maintenance Capabilities includes several aircrafts types and engines. After submitting the request to add B-737 aircrafts model for United Airlines the FAA approved and amended the Operation Specifications D107. The inclusion of the Boeing 737 aircraft's model, expand Jet Tech Aviation capabilities and show our customers that we can hold our promised target.

Mr. Luis Melendez, President/Chief Executive Officer of Jet Tech Inc., said:

We are delighted to add a new aircraft model in our Operation Specification D107 thus extending our services with United Airlines in San Juan, Puerto Rico. The addition enhances the two companies' relationship which has been in place since 2008. The partnership with the world's leading airline is a clear acknowledgement of the excellent professionals, knowledge and show that we are capable to provide top quality services.

“This is the results of a long, hard and committed work of the whole Jet Tech Aviation Team.”
