

## **Jet Tech Aviation: part of Southwest Airlines Overwater Certification process**

**San Juan, Puerto Rico 18 October, 2012** –Jet Tech Aviation, the Elite provider of Line Maintenance to Air Carriers and Corporate operators in Puerto Rico had an important role on **Southwest Airlines** overwater certification.

‘We are very proud to be part of Southwest Airlines Boeing 737-800 overwater certification. The entire staff were very professional and always were looking for the solutions to make this certification successful. Jet Tech Aviation collaborated with Southwest Airlines FAA Certificate Management Office officials through our facility inspection which was successfully completed and pass with excellent reviews. Those 5 days were very intensive and hard working, but we are very proud to be part of Southwest Airlines history,’ commented the President/CEO of Jet Tech Aviation, Luis Melendez.

Southwest Airlines Boeing 737-800 overwater certification flights began on October 15 thru October 19, 2012. The maintenance certification test was carried out on October 18, 2012. Jet Tech Aviation completed all the steps required to perform the assigned task from the FAA and a satisfactory completed Job Well Done review was appointed by the Southwest Airlines FAA Certificate Management Office officials in charge of the certification process and from the entire Southwest Airlines crew and staff.

*“This successful challenge will be part of Jet Tech Aviation Great memories”*
